RAVI BHATT

B.Tech | Artificial Intelligence & Data Science

+91 9057496989 | ravibhatt2406@gmail.com | github.com/ravibhatt2406 | LinkedIn

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in machine learning, retrieval-augmented generation (RAG), and full-stack development. Skilled in Python, model evaluation, LangChain, and LangGraph; interested in building practical AI-powered applications.

EDUCATION

Jaipur Engineering College and Research Centre, Jaipur | *2025 – 2029*

B.Tech in Artificial Intelligence and Data Science

EXPERIENCE

Intern | Vicharanashala Lab, IIT Ropar | *Sep 2026 – Nov 2026*

- Contributed to the open-source **FLN project**, implementing code improvements and exploring software development workflows.
- Performed **EDA, data preprocessing, and predictive modeling** on the ICRISAT agricultural dataset using **Linear Regression, Decision Tree, and Random Forest**.
- Applied **K-Means clustering** and explored **AI/ML, Generative AI, and MERN-stack technologies** through hands-on projects.

Freelance Project Developer | Titan Auto | *Project-based*

- Developed features for an automobile dealership platform, including customer analytics and automated sales reporting to support business insights.
- Integrated an AI chatbot experience for customer assistance and common vehicle-related queries alongside core web workflows.

PROJECTS

RAG-Based AI Teaching Assistant | *Python, LLMs, RAG, Embeddings*

- Built a retrieval-augmented pipeline to process lecture content, generate embeddings, retrieve relevant passages, and answer user questions with grounded context.

Customer Churn Prediction with Explainable ML | *Python, Scikit-learn, XGBoost, SHAP*

- Preprocessed customer data, engineered features, and compared classification models using precision, recall, F1-score, and ROC-AUC.
- Used SHAP to interpret model behavior and identify influential churn-related features.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C++

AI / ML: Scikit-learn, TensorFlow, XGBoost, Pandas, NumPy, feature engineering, model evaluation

Generative & Agentic AI: LangChain, LangGraph, RAG, LLMs, embeddings, AI agents

Web & Databases: React, Node.js, Express.js, MongoDB, MySQL

Tools & Visualization: Git, GitHub, Jupyter Notebook, VS Code, Matplotlib, Seaborn, Power BI, Excel

CERTIFICATIONS

DeepLearning.AI Machine Learning Specialization — Supervised Machine Learning; Advanced Learning Algorithms; Unsupervised Learning, Recommenders & Reinforcement Learning
